AUG 29 1967

July 24, 1967
CURRENT SERIAL RECORDS

WHEAT STOCKS LOWEST SINCE 1952 - SOYBEAN STOCKS RECORD HIGH

Wheat stocks on July 1, 1967 were 20 percent below a year earlier and the smallest since 1952. Durum holdings were about half as much as on last July 1, according to the Crop Reporting Board. Record high soybean stocks totaled 49 percent above last July 1 and 46 percent above average. Stocks of the four feed grains on July 1, 1967 totaled 65 million tons-10 percent below a year earlier and 30 percent below average. Stocks of rye were 3 percent less than a year earlier, but were the second largest for the end of a crop year since 1944. Flaxseed stocks were about 40 percent below a year earlier but 11 percent above average.

All wheat in storage on July 1 totaled 426 million bushels--the smallest carryover since 1952. July 1 holdings were 20 percent less than a year earlier and 62 percent below average. The decline in total stocks occurred in off-farm holdings. Wheat stored off-farm totaled 279 million bushels compared with 404 million a year earlier and the average of 1,021 million bushels. Farm stocks of 147 million bushels were up 16 million from a year ago and 38 million above average. July 1 stocks in all positions indicate a disappearance during the crop year--July 1, 1966 to June 30, 1967--of 1,420 million bushels compared with 1,598 million bushels a year earlier.

Durum wheat stocks in all storage positions on July 1 totaled 28.6 million bushels -- 47 percent below a year earlier and the smallest July 1 holdings in 5 years. Farm stocks, at 18.5 million bushels, were 23 percent less than last year while off-farm stocks of 10.1 million bushels were 67 percent below holdings a year earlier. July 1 stocks indicate a disappearance of 89.0 million bushels during the crop year ended June 30, 1967, compared with 83.2 million bushels in 1965-66.

Rye stocks on July 1 totaled 18.4 million bushels, 3 percent below a year earlier but the largest year-end holdings since 1944. Off-farm stocks were 14.8 million bushels, 2 percent less than last year, and farm holdings of 3.6 million bushels were 9 percent smaller. July 1 stocks indicate a disappearance during 1966-67 of 28.5 million bushels, up slightly from the 27.1 million bushel disappearance during the previous crop year.

Corn stocks in all storage positions on July 1 totaled 1,735 million bushels--3 percent less than a year earlier and 26 percent below the average July holdings. Current stocks indicate a disappearance of 969 million bushels during

the April-June quarter, exceeded only by the 1,080 million bushels the same quarter a year ago. Total disappearance, October 1966 through June 1967, at 3,208 million bushels, compared with 3,449 million bushels the same period a year earlier.

Corn stored on farms totaled 1,330 million bushels, slightly above the 1,324 million bushels a year earlier. Holdings of corn in off-farm positions totaled 405 million bushels, 12 percent below the 459 million bushels in off-farm storages last year.

Oats stocks in all positions totaled 268 million bushels, 15 percent less than July 1 holdings a year ago and 8 percent below average. Farm stocks were down 18 percent from a year earlier; off-farm holdings were 7 percent lower. Disappearance during the April-June quarter was 174 million bushels compared with 219 million bushels a year earlier.

Barley stored in all positions on July 1 totaled 120 million bushels, 15 percent more than a year ago but 8 percent less than the average for July 1. More barley was being held both on and off the farm than last year. Disappearance during the April-June quarter, at 85 million bushels, was 3 million bushels less than the previous year and 9 million below the average.

Sorghum grain stocks in all positions on July 1 totaled 336 million bushels, 37 percent less than a year earlier and 53 percent below average. Off-farm stocks of 252 million bushels were 45 percent less than a year earlier. However, farm stocks totaled 84 million bushels, 13 million above a year earlier, and a record high for that date. Disappearance of 194 million bushels during the April-June quarter, a record high, was slightly above that of last year.

Soybean stocks in all storage positions on July 1, 1967 totaled a record 199 million bushels, 49 percent above a year earlier and 46 percent above average. The increase from a year earlier was due to record high farm holdings of 85.4 million bushels. Stocks in off-farm positions totaled 114 million bushels, down 1 percent from a year earlier but 14 percent above average.

* Included in unallocated to avoid disclosing individual operations.

1/ Includes stocks at mills, elevators, warehouses, terminals, processors, and CCC owned grain at bin sites.

2/ Off-farm total plus farm stocks.

July 1 stocks indicate a disappearance during the period, September 1966-June 1967, of 768 million bushels from a supply of 967 million bushels (carry-over of 36 million bushels plus 1966 production of 931 million bushels). During the period 460 million bushels were processed for oil and 223 million bushels were exported. Soybeans used for seed and feed are expected to total about 48 million bushels.

Flaxseed stocks on July 1 in all storage positions totaled 9.2 million bushels, down 6.1 million bushels from a year earlier. Off-farm stocks, accounting for 84 percent of the total, decreased 4.1 million bushels, and farm stocks, decreased 2.0 million bushels from a year earlier. July 1 holdings indicate a disappearance of 30.0 million bushels for the crop year ended June 30 from a supply of 39.2 million bushels. During this period crushings totaled 19.7 million bushels, exports 7.5 million bushels and about 1.6 million bushels were used for seed.

CORRECTION

Stocks of Grains, Oilseeds and Hay, Statistical Bulletin No. 395
